

## Written Instructions for Downloading the Skyward App

*Disclaimer: These instructions are for an Android phone. There may be some slight differences for an iPhone.*

1. Go to Play Store.
2. Search for Skyward.
3. Select Skyward Mobile Family Access.
4. Add an Account - Select the school by one of the three methods available. Searching by zip code is probably the easiest option.
5. Log in with username and password. (This will be the same username and password that you use to visit Skyward using an internet browser. For parents/guardians, this will be the username and password that you received from the school office. For students and teachers, this will be the same username and password that you use to access all of your other school accounts.)
6. Click the save icon in the top right corner of the app.
7. The app will also give you the option to set a passcode that you can use to access your account. This will enable you to enter just the passcode when opening the app in the future instead of entering your full username and password each time.
