

HORNET TARGETS TRACKER

5TH GRADE SCIENCE

Discover · Explore · Practice · Create

1

I CAN identify, apply, and analyze the structure and properties of matter.

6

I CAN give support for the differences in the sun's brightness due to relative distance from the sun.

2

I CAN prove that the gravitational force by the earth is directed down.

7

I CAN use graphical displays to show daily changes of the stars in the night sky.

3

I CAN determine the effects that energy has on animals when produced by the sun.

8

I CAN use a model to describe the interaction between the geosphere, biosphere, hydrosphere, and atmosphere, including water distribution between them.

4

I CAN determine the effects that energy has on plants when produced by air and water.

9

I CAN explain how individual communities can use science ideas to protect the Earth's resources and environment.

5

I CAN develop a model to describe the movement of matter.

10

I CAN define, and test, a simple design reflecting a need or want, and compare multiple possible solutions to the problem.
